

Oracle Java Archive

The Oracle Java Archive offers self-service download access to some of our historical Java releases.

WARNING: These older versions of the JRE and JDK are provided to help developers debug issues in older systems. They are not updated with the latest security patches and are not recommended for use in production.

For production use Oracle recommends downloading the latest JDK and JRE versions and allowing auto-update.

Only developers and Enterprise administrators should download these releases.

Downloading these releases requires an oracle.com account. If you don't have an oracle.com account you can use the links on the top of this page to learn more about it and register for one for free.

For current Java releases, please visit Oracle Java SE Downloads.

Current update releases for JDK 6 and JDK 7 are available for support customers. If you already have a support contract see support note 1389674.2 For more details, please visit the Oracle Java SE Advanced page.

For more information on the transition of products from the legacy Sun download system to the Oracle Technology Network, visit the SDLC Decommission page announcement.

Java SE 8 Archive Downloads (JDK 8u202 and earlier)

Go to the Oracle Java Archive

The JDK is a development environment for building applications using the Java programming language.

The JDK includes tools useful for developing and testing programs written in the Java programming language and running on the JavaTM platform.

WARNING: These older versions of the JRE and JDK are provided to help developers debug issues in older systems. They are not updated with the latest security patches and are not recommended for use in production.
